NETWORK OPERATING SYSTEM

Task 7

Limit Local Account use

By

DEWTON KIPROP

- Open Group Policy Management: Press Windows Key + R to open the Run dialog, type gpedit.msc, and press Enter. This will open the Local Group Policy Editor.
- Navigate to Local Group Policy Settings: In the Local Group Policy Editor, navigate to Computer Configuration -> Windows Settings -> Security Settings -> Local Policies -> User Rights Assignment.
- Configure "Deny log on locally":
- Double-click on "Deny log on locally" policy on the right pane.
- Click on "Add User or Group" button.
- Add the local account(s) you want to restrict from logging on locally.
- Click "OK" to apply the changes.
- Configure "Deny log on through Remote Desktop Services" (Optional):
- Similarly, you can configure the "Deny log on through Remote Desktop Services" policy to prevent local accounts from accessing the server via Remote Desktop.
- Double-click on "Deny log on through Remote Desktop Services" policy.
- Add the local account(s) you want to restrict from logging on through Remote Desktop Services.
- Click "OK" to apply the changes.
- Force Group Policy Update (Optional):
  You can force a Group Policy update on the server using the gpupdate /force command in Command Prompt to apply the changes immediately.
- Verify the Changes: Test the restrictions by attempting to log on to the server using the restricted local account(s). Ensure that the logon attempts are denied as expected.
